Dear Canada Health Infoway,

I am writing to express my strong interest in the **Specialist, Standards** position at Canada Health Infoway. As a licensed pharmacist and Clinical Informatics Specialist with extensive hands-on experience configuring Epic EMRs, implementing clinical standards, and working with HL7 and SNOMED CT, I am confident in my ability to contribute meaningfully to the advancement of Canada's pan-Canadian interoperability goals.

I am self-driven and looks forward to take on challenges. I am a self taught developer and have successfully implemented custom MUMPS solutions for Hamilton Health Sciences as part of my current role. . I've worked with team members on HL7 interfaces and terminology mapping as part of efforts to optimize electronic workflows for real-world clinical scenarios. My role also involves translating end-user requirements into robust informatics tools, enhancing safety and provider efficiency.

My combined clinical and technical background positions me well to support the Canadian Standards Release Centre and its national objectives. I've contributed to medication management and hold several Epic certifications, including in Willow Inpatient, Chronicles, and Procedure Orders. I also co-authored two peer-reviewed publications on deprescribing antipsychotics, which demonstrates my ability to synthesize clinical data into actionable knowledge.

I am particularly excited by the opportunity to contribute to a national initiative shaping the future of healthcare interoperability in Canada. I share the commitment to a data-driven, equitable, and modern digital health systems and would be proud to be part of this transformation.

Thank you for considering my application. I welcome the opportunity to discuss how my skills and experience can support Infoway's efforts.

Sincerely,

Raymond (Linbin) Gao
